

THE CARTOGRAPHER

of Small Islands

A SAMPLE BOOK FOR PDBOOK

The Drawer

The harbour master kept a drawer of maps that nobody had asked for. Each one showed an island no larger than a kitchen table, drawn with the same care as a continent.

He measured them at low tide with a knotted rope and a borrowed compass, then sat by the lamp and inked every rock, every tuft of grass, every place where a gull had decided to nest.

Visitors laughed at first. Then they began to notice how the small maps made the sea feel smaller too, as if the whole horizon could be folded and carried home in a coat pocket.

In winter the islands vanished under grey water and he redrew them from memory, which was not the same as drawing them wrong.

The harbour master kept a drawer of maps that nobody had asked for. Each one showed an island no larger than a kitchen table, drawn with the same care as a continent.
